

## **Testimonials**

*"After experiencing the water for a couple of months i have improved stamina, better focus."*

Stan c pagosa springs, colorado

*"Since installing a structured water unit in my yard sprinkler system earlier this year, several things have occurred. I was able to save water by watering less frequently and for shorter lengths of time. I only fertilized once this past summer, thus i saved on fertilizer expense and the grass is still greener, thicker and plusher than it has ever been at the end of the growing season. I am truly delighted with the structured water unit."*

Bill chester sandy, utah

*"Being a skeptic by nature and profession, i am a scientist; i am leery of any claims that are put on a product. Show me the proof. When my wife first approached me on a unit that could be attached in line with our water system that would not only improve water but could actually improve our health i could only think she had been suckered in by a fast talking charlatan selling snake oil remedies."*

*I agreed to have a unit (structured water) installed on the condition that it came with a money back trial if we were not satisfied. Thinking that this was a no brainier and we would get our money back i could save face and tell my wife "see i told you." Much to my surprise the first time i took a shower i had the sensation that i had used a conditioner on my head.*

*Truly it could not be that on the very first use that i would feel results. I then decided to drink some and immediately on raising my glass to my mouth realized that it did not smell like our tap water. On tasting the water it was evident that it was different. I am not certain how it works at least from a scientific point other than to say that i understood the scientific reason behind the principal. Structured water is an apt name as that is exactly what it does. I am so convinced by the unit that when i asked my wife what was it called she said that the product was so new that they had just recently named it. I told her that it should be called "miracle water". I believe so much in the product that i have purchased additional units for all my family especially for my daughter who has a new born. I would never return this product for any reason."*

Ed chacon (archo astronomer) santa fe, new mexico

*"After a long week and a shorter weekend, i was just drained on a sunday. My friend called me and i told him i was really tired of "being tired" all of the time. He said he had something for me to try and brought over some water from the structured water unit. I was a complete skeptic, as always."*

*After drinking about three glasses of this water however, i felt like a new person and so did my wife after she had a couple of glasses. We were both in awe! We had a raw, natural energy that we hadn't felt in years! I went from exhausted to feeling 20 years younger, in a matter of an hour!*

*Now we have a structured water unit of our own. The benefits are incredible! We both feel better, our skin is like silk. The "itchy leg syndrome" that seemed to be haunting us and the rest of the country when we try to go to sleep - is gone. That is worth so much in itself, it's hard to stress. The bathtub is clean and does not have the standard mold and buildup associated with showers. We're not sure how the structured water unit does its magic, but it is magic! We wouldn't go a day without it now..."*

-Brian z. Salt lake city, utah

*"I wanted to share with you another benefit of the structured water. I had not said anything previously to anyone because i wanted to give it more time to make sure of the results."*

*From the time i was 16, i had psoriasis which mainly appeared on the outside of my ankles and my elbows. The itching was unbearable and on many occasions i would awake in my sleep scratching to the point of breaking the skin. The way it was explained to me, my condition was such that the new skin cells would die before they reached the epidermis. My parents took me to the doctor and he wanted to put me on nerve pills which my parents vehemently refused.*

*Throughout the years i had been to dermatologists and my own physicians; subjected to tar baths, anti-itching cremes with hydrocortisone and even ultra-violet light treatments. The uv treatments are particularly funny since uv rays actually destroy skin cells - something i didn't find out until later. So much for the intelligence of modern medicine.*

*Over the years, in doing my own research, i read that psoriasis and excema are auto-immune diseases. While that may be true, it is curious to me that during both of my pregnancies, my skin condition cleared up completely only to return after i gave birth.*

*Now that would lead me to believe that the condition is more a cause of hormonal imbalance though i did not realize that at the time. Just like the symptoms of heavy menstrual bleeding and growths in the uterus. Unfortunately, it was not until after i had a hysterectomy did i find this out from my current physician, a naturopath.*

*Anyway back to the subject of skin.....I have not had the severe itching over the last 10 years, however, because of the prior damage from scratching, i had lost pigmentation on my ankles and one elbow. I had been told by physicians years ago that i would never regain the pigmentation.*

*That brings me to current day experience with structured water. It has proven the world of modern medicine to be wrong! The pigmentation in my skin has slowly been coming back since drinking the structured water. Where there were once pale patches of flesh are now normal skin tone on my one elbow. On my ankles, the pale patches are being replaced with dots of normal skin color that are filling in.*

*I felt this was important to tell you because it is a hugely significant test of the healing power of structured water. I also have a very long scar on my right knee from a surgery when i was a teenager. I know that, over the years, scars will lighten. After more than 38 years, the scar had lightened as much as it was going to and it was still significantly noticeable. The skin in the scarred area is also showing signs of blending with normal skin tone. I do not have any significant pain in the knee, just a mild discomfort once in a while. Aside from the visual reduction of the scar, i no longer have any discomfort in my right knee. I was told by a physician that my knee no longer had the 'cushioning' and eventually i would have to have it replaced. I have always told them that i would never have the knee cap replaced; i was born with it; i'll die with it.*

*I also have 4 small incision scars on my left knee (two above, two below) from 2 scope surgeries in 1989. Where i recently was able see the scars, three of them have completely disappeared; one is barely noticeable. I do not know if or how this will fit in with your studies of the effects of structured water, but please feel free to add them as you see fit."*

*Best,  
-Jacqueline shepard*

*"I work at a natural lifestyles company and we have a large vegetable garden that we all work with and eat from. We were forced to replant the vegetable garden after realizing that our plants would not sprout due to large amounts of calcium in our well water system. The calcium had created a hard crust over the soft soil making it impossible for sprouts to penetrate through. When i first heard the simple explanation for how the structured water unit worked i was not expecting much; to be direct, it seemed too simple to be true.*

*In any event, we connected the garden structured water unit to the hose, and began watering. About this time i left town for 9 days and while i was away we continued to water the garden with the structured water unit. When i returned the garden had not only sprouted, but many of the plants were already 6 inches tall! The garden is now 5 months along and as you can see in the photo's that i sent we have more veggies than we can eat. Also we have noticed that we do not need to water as often as you said, the plants absorb more water because of the lower surface tension of the water after passing through the device. The owners of our company value it so much that they have since installed the whole house unit so that they could have structured water for showering and cooking as well. Thank you once again for making this simple and inexpensive product available."*

*-Michael copeland, sacred health, sedona, az*

*"Our new structured water unit is producing amazing changes in our water! My skin feels soft and lubricated after bathing. I use less soap and shampoo. Less soap is needed for washing the clothes. The new water has rejuvenated our plants. My husband says our water tastes better too; and morning coffee is smooth - no longer bitter. We love the new structured water unit and the new life it has produced in our water."*

*-Lileth b. Randall, slc utah*

*"I've never been so excited to shower now that we have this unit in our shower. The cats are loving the water already and my skin is feeling great."*

*-Missy norgan, las vegas*

*"The cats have been drinking the water now for a few days - the youngest one being the first to explore it - she has somewhat of a lazy-eye - i noticed today that it seems to be straightening and she is much more relaxed in her environment and not fighting the condition so much now - awesome sir!!! Many, many thanks again!!"*

*-Gene eskelson, salt lake city, utah*

*"Since i've been using the structured water, i noticed that the water makes my hair softer and my skin too! The structured water unit is a great product. When i drink it i feel refreshed. I like that kind of water. The water we had installed, before we installed the structured water unit made my hair and face dry and oily, now i feel soft. Well, i got to go. Bye. I am 11 going on 12 years old."*

-Allison krok, salt lake city, utah

*"Thank you so very much for bringing this extremely important technology to the market place. I am excited to share my reason for writing this letter of thanks. Our vacant lot by the restaurant is growing 15 ft. Sunflowers & a lush vegetable garden since using the structured water unit."*

-Kelly johnson, bliss cafe, sedona, az

*"Since i began with structured water about two weeks ago, i have sponged off two of my beloved cats, each in her distinct area of chronic irritation (despite vast and creative other approaches - vet, holistic and energetic), one having been treated for over four years.*

*Both cats showed immediate improvement - in one, general itchiness subsided (after months of this hassle); and in the other, a runny eye lessened (and she was looking at me again for the first time in about two years, instead of turning her head away). I am continuing to sponge off these two kitties, as well as provide utopic water for all drinking purposes. Both cats' conditions are significantly better in just a short time!*

*Further, all my five cats are getting along better together, noticeably so! They weren't too raucous, before, but it is very loving and peaceful here now! And also they seem more cognitive generally, and more communicative with me."*

*Thank you!*

-Nimueh

*"I'm enjoying drinking my water and showering with your structured water unit. I went 2 days without putting lotion on (which i always do). My skin is definitely more hydrated, but still need lotion to stay looking good by the end of the day. Who knows..... Maybe time will change that too. I'll let you know! Talk with you soon!"*

-Deborah, sedona, az

*"I have much more wildlife on the property and my wife uses the structured water to fill up the water trays for the birds. Our greenhouse is enjoying the structured water--we have a pond in there as well, and there is no algae. I know the vegetable plants and herbs are really enjoying this new level of coherence I think our land (we have 3 acres) has improved its energy level. I have noticed that i have more energy, and have more availability within myself to observe the mind. I have started 3 very sick patients on your filters, and will let you know how they respond."*

*Take good care,*

*Sam berne*

*"The structured water unit is the most outstanding water alchemist i've ever experienced. My garden has grown twice the size this year that it was the same time last year. Personally, my body has noticed tremendous healing change. I feel more oxygenated in my body. My candida has been purified. I think this device is outstanding."*

*Thea ivie, nd, sedona, az*

*"I decided to do an experiment. I took my glass pans and i filled them both with the structured water (no soap) and left them overnight. They had been soaking all day yesterday and i still couldn't get the cooked on food particles off. When i got up this morning, i went to clean the pans (without soap or hot water). The stuff came off with no problem and no major scrubbing.*

*I did run the hot water for the rest of the dishes. The hot water came out of the faucet very, very hot! I almost couldn't touch it. And who even needs soap? (Though i did use my eco-friendly soap). Oh my goodness!! I am absolutely stunned! I keep looking at my drinking glasses and plastic storage (which i never heat) and they are all so incredibly clean, spot-free."*

*Best,*

*-Jacque*

*"We received your shower unit a couple weeks ago and promptly installed it on the water feed line into our 40 foot 5th wheel camper. We had been here on the coast of Texas for 6 or 7 weeks at that point and the poor water quality had caused an alarming re-occurrence of dawna's 38 year psoriasis affliction which had been well under control for the last 2 years due to our extensive use of shower water filtration and long daily treatments with our wellness pro 2010. Despite her continued use of the wp system these past weeks the poor water quality had begun causing a severe upsurge in her psoriasis. That changed within 3 days of installing your shower unit on the rv's water system. It shut down the psoriasis to a nubbin and has noticeably improved her recurrent indigestion and irritable bowel syndrome as well.*

*Thank you so much for staying on the long course of your water research and development. No doubt thousands of people are benefiting from your work on these awesome units and the millions more in need of these remarkable units there shall never be a dull moment as we work to spread the words on the benefits of structured water."*

*Thanks again,  
-Jeffrey and dawnna*

*"Just wanted to drop you a note and bring you up to date on plant growth here. The tomatoes are the big story. The main stalk on all the tomato plants are four to five times larger in diameter. Really weird to view as they seem to have morphed into tomato plants on steroids. All the fruit on these plants is still green, but it has been exceptionally cool, at night, all summer long.*

*The hot tub water is wild. Feels like rain water; all the time (just like the shower and bath). This has to be due to filling with structured water, having the garden unit on the hot tub and using only one teaspoon of chlorine every two weeks. The chlorine is probably just a mental thing at this point.*

*Skin is much smoother and requires little or no lotion where much was needed before (i live at 8000 feet in a very dry climate). Soap scum has been reduced on all surfaces by 80% or more. The dishes are squeaky spotless, the shower doors are clear and all calcium deposits are.....Non existent !!!! Also, no water spots on the cars and trucks when washed.*

*As from the start, the only water we'll drink is from the structuring unit; all other water will not do !!! Can't stand the taste of all bottled water and chlorinated tap water smells and tastes like swimming pool water. Don't have a pool, but if i did, i would have a commercial unit and do away with the chemicals.*

*My grass is a deeper green and has to be trimmed twice as much as the surrounding neighbors. All plants have grown at an alarming rate and seem to resist near freezing temps much more than i ever recall in all previous plantings.*

*This is truly a gift of knowledge that should not be ignored. Water is a remarkable substance and we have a long way to go in the complete understanding of what it is and what it does."*

*Thanks,  
-Christopher cozby*
